Node.js, Express, REST APIs, Authentication, Role-Based Access

Database:

MongoDB, Schema Design, Data Modeling, Aggregations

Other:

Git, API Integration, Real-Time Systems (WebSockets), Product-Driven Development

PROFESSIONAL EXPERIENCE

Logi — Logistics Management System

Full-Stack MERN Developer | *May 2025 – Present*

Focus: Operations, system architecture, scale

- Leading end-to-end development of a logistics platform handling **deliveries, fleet**

operations, staff management, payroll, and reporting

- Designed backend services and MongoDB schemas to support **complex logistics workflows and status lifecycles**
- Built operational dashboards used daily by admins and operations teams
- Implemented role-based permissions across multiple departments
- Ensured smooth integration between frontend interfaces and backend services

Big Circle — Social Networking Platform

Full-Stack Web Developer | *Jan 2024 – Present (Remote)*

Focus: Social systems, real-time communication

- Built a social platform connecting users based on shared interests and personality traits
- Implemented onboarding, profile creation, and personalized dashboards
- Designed matching and recommendation logic for user connections
- Integrated **real-time chat** using WebSockets
- Optimized performance and scalability for growing user traffic
- Implemented secure authentication and data protection measures

G4L Studios Limited — E-Learning Platform

Frontend Developer | *Feb 2024 – Present (Remote)*

Focus: Multi-role systems, scalability

- Contributed to frontend development of a **multi-role e-learning platform** for students, teachers, and administrators
- Implemented authentication and role-based access control
- Built admin tools for managing users, subjects, and academic structure
- Developed teacher tools for uploading and organizing curriculum-based content
- Implemented logic to deliver **grade-specific content** to students
- Helped structure the platform to be reusable across multiple schools

Alpha Care — Healthcare Platform (USA)

Full-Stack Developer | *Sep 2024*

Focus: Data sensitivity & onboarding

- Built website for an healthcare platform

Daily's — Multi-Branch Grocery E-commerce Platform

Full-Stack Developer | Feb 2025 – Apr 2025

Focus: Multi-branch architecture

- Built an e-commerce system supporting **multiple grocery branches** under one platform • Designed backend logic to isolate branch-level products, pricing, and orders • Implemented frontend ordering and management workflows

Trippayer — Transportation & Logistics Platform

Web Developer | Feb 2023 – Nov 2023 (Remote)

Focus: Booking workflows & payments

- Built and maintained a web platform providing structured information about transportation services
- Implemented ride booking features supporting **instant and scheduled trips**
- Integrated payment functionality for seamless in-platform transactions • Improved user flow from service discovery to booking confirmation

Esquire Resorts — Hotel Booking System

Full-Stack Web Developer | Jan 2023 – Mar 2023

Focus: Reservations & admin tooling

- Led development of a hotel booking system from concept to deployment
- Implemented room availability logic and booking workflows
- Integrated secure payment gateways
- Built an admin dashboard for managing reservations and room availability • Implemented customer accounts for managing bookings
- Ensured full responsiveness across devices

Architect Portfolio — CMS-Driven Website

Full-Stack Developer | Jun 2024

Focus: Content management

- Built a custom CMS allowing an architect to manage portfolio content independently
- Developed backend endpoints for content creation and updates
- Implemented a clean, high-performance public site

Partigram — Event Vendor Marketplace

Full-Stack Developer | 2023

Focus: Marketplace & messaging

- Built a two-sided platform connecting event vendors with customers
- Implemented vendor discovery, listings, and direct messaging
- Designed backend logic for marketplace interactions

Fountain / Hallway — Learning Management System (LMS)

Full-Stack Developer | 2023

Focus: Education workflows

- Built an LMS for a secondary school in Nigeria
- Developed APIs for courses and learning materials
- Implemented role-based dashboards for students and administrators

Kain Kain — Art Gallery Website

Full-Stack Developer | Feb 2023

Focus: Visual presentation

- Built a portfolio website for an art studio and gallery
- Designed flexible layouts to showcase artworks and exhibitions

Amen Jet — Healthcare Agency Website

Full-Stack Developer | 2023

Focus: Business onboarding

- Built a healthcare agency website with staff onboarding flows

- Developed backend logic for capturing and managing applicant data

PERSONAL PROJECTS

Print Runner (Clone) — E-commerce Platform

Frontend Developer | *Dec 2022*

- Recreated a printing e-commerce website with focus on UI/UX and checkout flow •
Built product catalog, ordering flow, and responsive layouts
- Integrated secure payment processing

Lyrics Finder — Music Search App

Full-Stack Developer | *2022*

- Built a web app that identifies music using lyric input
- Integrated third-party music and lyrics APIs

EDUCATION

UNIVERSITY OF ILORIN - Kwara, Nigeria
Bachelor of Science, Computer Science; final year.
